COMPANY BIO

Knight's Armament Company was originally founded by Mr. C. Reed Knight Jr. in order to focus on products that would meet the unique requirements of the U. S. Special Operations Forces. In collaboration with Mr. Eugene Stoner, which led to the production of the renowned SR-25 rifle, Knight's developed some of the most sought after modern firearm designs ever produced. From the first developments in signature reduction devices, to the revolutionary RAS rail system and the Knight Vision UNS family of electro-optics, Knight's commitment to quality and high manufacturing standards deliver innovative, reliable and functional weapon systems and accessories for our U.S. military, federal agencies and law enforcement entities. The entire Knight's product line is designed, tested and manufactured in our Titusville, Florida facility in order to perform consistently and unflinchingly for our first responders. In addition, Knight's applies the same principles and commitment to quality to our commercial product line. From firearms and accessories to state of the art electro-optics, rely on the Knight's family of products when it matter most.

SR-25

SR-25 SERIES

The SR-25 E2 series of rifles is the end result of decades of improvement and refinement to the AR-10 type rifle. While each model is oriented to an application, they all share high reliability, long critical part life and intuitive ambidextrous controls. Tested to and validated by the harshest combat conditions, they prove to perform as required. Barrel and bolt life are significantly increased, reducing the need for part replacement and extending maintenance cycles. An ambidextrous bolt release, selector and magazine release offer the left-handed user

the ergonomic advantages inherent to AR-15 based controls, as well as giving right-handed users alternate methods of manipulation to increase efficiency of movement. The Drop-In 2-Stage Trigger serves double duty as an aid to long range precision marksmanship and also enabling surgical speed while shooting at close range. The trigger is not susceptible to change due to fouling or wear. A 7.62QDC Flash Suppressor reduces flash and ground disturbance and also supports KAC QDC Signature Reduction Devices, right out of the box.

A close-up, high-angle photograph of a black SR-30 rifle. The rifle is positioned diagonally across the frame, pointing towards the top right. It features a Picatinny rail with a mounted red dot sight. The magazine is a curved, silver-colored metal. The background is a light-colored, textured surface, possibly a metal plate, with some faint markings. A semi-transparent horizontal band is overlaid across the middle of the image, containing the text 'SR-30' in a bold, italicized font. Below this band, a series of seven overlapping black hexagons are arranged horizontally, partially obscuring the rifle's body.

SAFE FIRE

SR-30 SERIES

The SR-30 takes advantage of the .300BLK cartridge, enabling a 9.5" barrel to be as capable as an 11.5" 5.56mm SBR. KAC's proprietary mid-length gas system increases reliability, durability, minimizes leakage and ensures more consistent operation in harsh conditions, with or without an attached sound suppressor. The Mod 2 gas block is secured with a locking ring, which results in a more rigid barrel due to the elimination of taper pin grooves. This removes the need for individually fit gas blocks. An improved E3 round-lug bolt design enhances function and increases bolt life far beyond the industry standard. The URX4 handguard reduces weight through use of negative-space mounting systems and an integral barrel nut. An ambidextrous bolt release, selector and magazine release offer left-handed users the ergonomic

advantages inherent to AR-15 based controls. This also provides the right-handed users alternative methods of manipulation to increase efficiency of movement. The Drop-In 2-Stage Trigger serves double duty as an aid to long range precision marksmanship and also enabling surgical speed while shooting at close range. KAC QDC supporting muzzle devices are included, and the rifles are ready to host a suppressor with no permanent changes needed to ensure long-term reliability. Receiver End Plate with Ambidextrous QD Sling Swivel Sockets, 6-Position Collapsible Stock, Fully Ambidextrous Lower Receiver Controls, Extended Charging Handle Latch, Folding Front and 200-600 Meter Rear Micro Iron Sights are standard features of the SR-30.

SR-15 SERIES

The SR-15 E3 Mod 2 line represents the pinnacle of the unique and revolutionary Stoner-designed operating system. The Mod 2 line features a proprietary mid-length gas system that increases reliability and durability, while also reducing felt recoil. This minimizes leakage, ensuring more consistent operation in harsh conditions, with or without an attached sound suppressor. The Mod 2 gas block is secured with a locking ring, which results in a more rigid barrel due to the elimination of taper pin grooves. This removes the need for individually fit gas blocks. An improved E3 round-lug bolt design enhances function and increases bolt life far beyond the industry standard. SIGNATURE REDUCTION DEVICES

Knight's has been designing, testing and manufacturing signature reduction devices for over 30 years. From humble beginnings using hand calculations, coupled with extensive testing, Knight's suppressor research and design has progressed with the pace of technology. In our suppressor development, the use of finite element analysis programs, high speed video, thermal imaging and sound pressure recording devices has helped Knight's maintain its legacy of pioneering influential Signature Reduction Devices. The resulting innovative sound suppression products, such as the quick detach NT-4, the reflex-style MK11/M0110 suppressor and our new QDC (Quick Disconnect Coupler) platform, have led to Knight's becoming the largest supplier of sound suppressors to the U. S. Government. One of our primary goals at Knight's is to drive suppressor technology forward. Each Signature Reduction product we manufacture serves as a testament to this effort and the benefits are passed on to every one of our customers.

LEGACY SUPPRESSORS

SR-25 RIFLE SUPPRESSOR 7.62/.300 PN: 98440

Gate Latch Connector attaches to SR-25 gas block. For rifles without muzzle device such as the Mk 11 Mod 0 and SR-25 ER. Length: 12.25" Weight: 29.9 oz NSN: 1005-01-474-0197

M110 SUPPRESSOR 7.62/.300 PN: 24611

Connects to SR-25 gas block. For rifles with M110 flash hider only. Gate Latch Connector Length: 14" Weight: 32.0 oz NSN: 1005-01-542-4487

H&K USP-T .45 CALIBER SUPPRESSOR PN: 97225

Threaded Connection for USP Pistols Length: 7.5" Weight: 15.4 oz

MK23 .45 CALIBER SUPPRESSOR PN: 94368

Threaded Connection for Mk23 Pistols Length: 7.5" Weight: 15.4 oz NSN: 1005-01-435-1917

SUPPRESSORS 5.56

5.56MM QDSS NT4 (BLACK) KIT PN: 96062-1

Connects to M4QD and Triple Tap Compensator.
NT4 Gate Latch Connector.
Length: 6.5" Weight: 22 oz NSN: 1005-01-437-0324

5.56MM QDSS NT4 (FLAT DARK EARTH) KIT PN: 96062-2

Connects to M4QD and Triple Tap Compensator.
NT4 Gate Latch Connector.
Length: 6.5" Weight: 22 oz NSN: 1005-01-568-4844

5.56QDC/CQB SUPPRESSOR P/N: 30192

Connects to all 5.56 QDC Muzzle Devices. QDC Connection.
Available in Black and Flat Dark Earth (-BLK) (-FDE).
Length: 5" Weight: 13.2 oz

5.56QDC SUPPRESSOR PN: 30123

Connects to all 5.56 QDC Muzzle Devices. QDC Connection.
Available in Black and Flat Dark Earth (-BLK) (-FDE).
Length: 6.5" Weight: 16.7 oz

7.62 SUPPRESSORS

M110 SUPPRESSOR 7.62/.300 PN: 24611

Connects to SR-25 gas block. For rifles with M110 flash hider only. Gate Latch Connector
Length: 14" Weight: 32.0 oz
NSN: 1005-01-542-4487

7.62QDC/CQB SUPPRESSOR 7.62/.300 PN: 30179

Connects to 7.62 MAMS and 7.62 Flash Hider. QDC Connector. Available in Black and Flat Dark Earth
Length: 6.43" Weight: 14.1 oz
NSN: 1005-01-601-1822

7.62QDC SUPPRESSOR 7.62/.300 PN: 30178

Connects to 7.62 MAMS and 7.62 Flash Hider. QDC Connector. Available in Black and Flat Dark Earth
Length: 7.78" Weight: 19.6 oz
NSN: 1005-01-623-8914

MUZZLE DEVICES

The KAC MAMS (Multi-Axis Muzzle Stability) muzzle brake provides compensation in all axes, allowing the shooter to maintain point of aim from either shoulder, in any position. The MAMS is designed to minimize shooter signature by reducing flash blast, and lateral concussive force compared to other similarly performing brakes. The QDC mounting method provides industry-leading suppressor shift mitigation and consistency and is compatible with the family of 556 and 762QDC suppressors.

The KAC QDC Flash Hider is a major step forward in signature suppression and suppressor hosting. The three tines provide superior strength, longevity, and flash signature reduction that will not ring during firing or when struck. Muzzle device kits come complete with shims and thread locker for assembly.

HANDGUARDS

One of the products that put Knight's on the map was the revolutionary M4 Carbine Rail Adapter System (RAS), a robust, quad rail handguard that has been issued to over 1 million of our nation's warfighters. We have since improved and refined our forend system designs, constantly striving for better ergonomics, lighter weight, increased stability and added modularity. The URX 4 is an example of Knight's drive to innovate and manufacture intelligent solutions for the contemporary user. The URX 4 is our first negative-space accessory mounting compatible system, as well as our most stable handguard to date due to its one-piece construction. The URX 4's unique patented Integrated Barrel Nut (IBN) attachment method allows the handguard itself to act as the barrel nut, eliminating this separate component entirely; creating an exceptionally lightweight, yet solid platform.

M-LOK CONTROL ACCESSORIES

M-LOK 3" RAIL SECTION (5 SLOT)

P/N: 31912

This KAC M-LOK Accessory Rail is 3" in length and provides a 5 slot section of MIL-STD-1913 Picatinny rail for the addition of tactical accessories. Designed specifically for the URX 4 handguard, this rail section is also compatible with any other rifle handguard that has a M-LOK interface. Aluminum construction.

M-LOK SCOUT LIGHT MOUNT

P/N: 31906

The KAC M-LOK mount for SureFire M300 and M600 Scout Lights is a lightweight, direct-attach mounting platform that replaces the OEM mount. The mount can be positioned to place the light close to the handguard at any position from 1-30 to 11-30 in relation to the top 12:00 rail. Aluminum construction.

M-LOK BARRIER STOP

P/N: 31916

The KAC M-LOK Skeletonized Barrier Stop eliminates all unnecessary weight while still being robust enough for hard-use. The serrated front edge will bite into most surfaces at any angle of contact. Steel construction.

M-LOK BARRIER STOP WITH INTEGRAL QD SOCKET

P/N: 32397

The KAC M-LOK Barrier Stop attaches quickly and securely to an M-LOK interface. Aluminum.

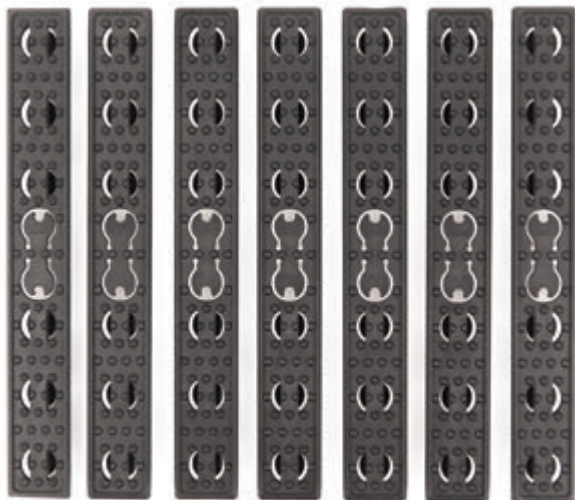

M-LOK SLING MOUNT

P/N: 32096

The KAC M-LOK Sling Mount attaches quickly and securely to an M-LOK interface. The sling mount is compatible with pushbutton sling swivels (sold separately). Keymod QD Sling Mount P/N: 30708

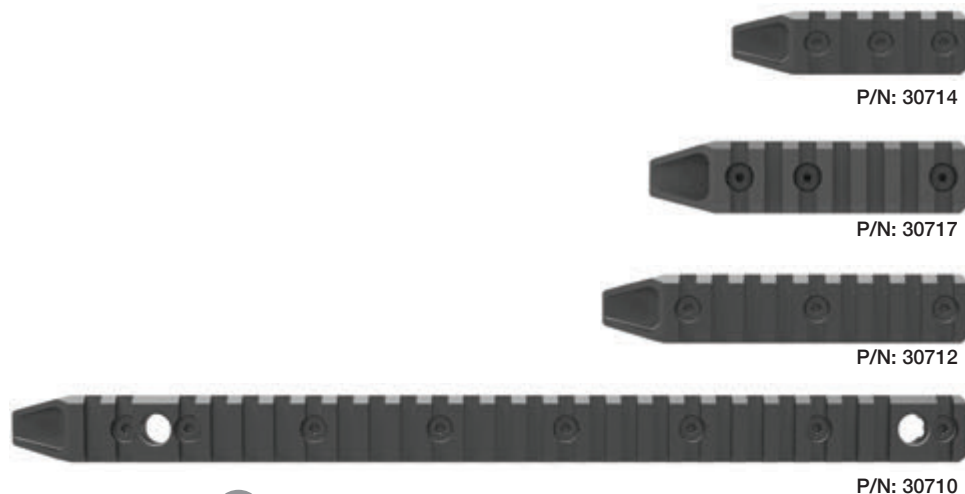

KEYMOD FLAT PANEL KIT

P/N: 31190

The Knight's Keymod Flat Panel Kit includes a set of seven polymer rail panels. Each textured panel snaps securely to any bare section of Keymod equipped rail, providing a more positive gripping surface and also insulating the support hand from barrel heat. While designed for the URX 4, these panels will also fit any other rifle handguard that has a Keymod interface. Available in Flat Dark Earth-FDE, and Black-BLK.

P/N	NAME	LENGTH
30714	KEYMOD 5-Slot Rail	3"
30717	KEYMOD 7-Slot Rail	3.7"

30710	KEYMOD Full Side Rail	12"

CONTROL ACCESSORIES KEYMOD

KEYMOD SCOUT LIGHT MOUNT

P/N: 31232

The KAC Keymod mount for SureFire Scout Lights is a lightweight, direct-attach mounting platform. The mount can be positioned to place the light tight to the handguard at any position from 1:30 to 11:30. Aluminum construction.

KEYMOD HANDSTOP

P/N: 30795

Textured handstop provides a reference point for the support hand that helps the shooter to acquire a consistent grip on the rifle. Lightweight polymer construction. Available in Flat Dark Earth-FDE, and Black-BLK.

KEYMOD BARRIER STOP

P/N: 31233

The KAC Skeletonized Keymod Barrier Stop eliminates all unnecessary weight while still being robust enough for hard-use. An aggressively serrated front edge will bite into most surfaces at any angle of contact. This barrier stop incorporates a QD sling swivel socket, as well as the ability to clip a sling directly to the device via an HK-style clip. Aluminum construction.

KEYMOD BELT HOOK ASSEMBLY

P/N: 30750

The KAC Keymod Belt Hook Assembly attaches quickly and securely to the URX 4 rail or any other rifle handguard that has a Keymod interface. It is useful for securing a rifle out of the way by hooking it to one's belt or to a section of webbing, freeing the user's hands to perform other tasks. Aluminum construction.

KEYMOD SLING HOOK ASSEMBLY

P/N: 30749

The KAC Keymod Sling Hook Assembly was designed for uses of single point slings. When both hands are required for non-gun-related tasks, the user may snag a portion of the sling with the hook, drawing the rifle's forend snugly to the side of the body instead of dropping the gun to bounce freely between the legs. It attaches and securely to the URX 4 or any other rifle handguard with a Keymod interface. Aluminum construction.

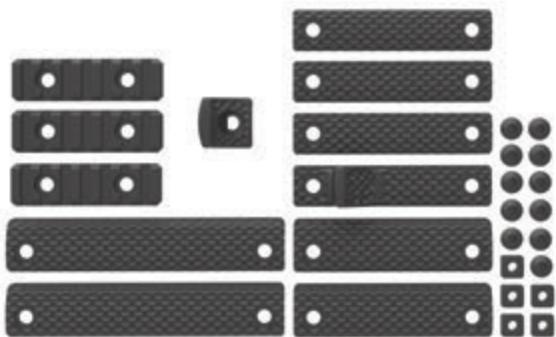

KEYMOD QD SLING MOUNT

P/N: 30708

The KAC Keymod Sling Mount attaches quickly and securely to the URX 4 or any other rifle handguard that has a Keymod interface. The sling mount is compatible with push button sling swivels (sold separately).

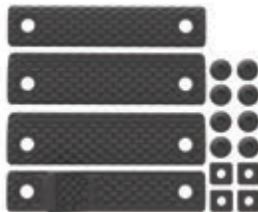

CONTROL ACCESSORIES PANEL KITS URX 3.1

URX 3.1 DELUXE RAIL PANEL KIT

P/N: 30409

1 - single hole hand stop with long installation screw, 3 - slim 2 hole panels, 2 - standard 2 hole panels, 2 standard 3 hole panels, 1 standard 2 hole hand stop panel, 3 - 8 rib rail sections, 10 installation screws, 5 - square backing nuts. Available in Flat Dark Earth-FDE, Taupe-TAU, Tan-TAN, and Black-BLK.

URX 3.1 PANEL KIT

P/N: 30408

1 - single hole hand stop with long installation screw, 3 - slim 2 hole panels, 2 - standard 2 hole panels, 2 standard 3 hole panels, 1 standard 2 hole hand stop panel, 3 - 8 rib rail sections, 10 installation screws, 5 - square backing nuts. Available in Flat Dark Earth-FDE, Taupe-TAU, Tan-TAN, and Black-BLK.

URX 3.1 PANEL KIT

P/N: 30410

2 - standard 3 hole panels, 1 - slim 2 hole panel, 1 - standard 2 hole hand stop panel, 8 - installation screws, 4 - square backing nuts. Available in Flat Dark Earth-FDE, Taupe-TAU, Tan-TAN, and Black-BLK.

URX 3.1 & MIL-STD-1913 CONTROL ACCESSORIES

URX 3.1 HANDSTOP

P/N: 30411

Attaches to URX 3.1 handguard systems, Includes attachment screw and retention nut. Available in Flat Dark Earth-FDE, and Black-BLK.

URX RAIL 7 SLOT

P/N: 30412

MIL-STD-1913 rail section. Polymer construction, Available in Flat Dark Earth-FDE, and Black-BLK. P/N: 30412-ALU constructed of aluminum.

URX 3 & 3.1 QD SLING SWIVEL MOUNT KIT P/N: 30491

Attaches to URX 3.1 handguard systems, Includes attachment screw and retention nut.

URX 3.1 SLING HOOK

P/N: 30700

Compatible with both URX III and URX 3.1 handguards.

URX 3.1 BELT HOOK

P/N: 30701

Compatible with URX 3.1 handguards.

SWIVEL MOUNT ASSEMBLY

P/N: 98720

Push button sling swivel mount that fits any MIL-STD-1913 rail to allow for optimal operator customization. NSN: 1005-01-498-4854

RUBBERIZED THUMB REST

P/N: 30537

This rubberized thumb rest features an elevated stop and textured grip to accommodate an isosceles shooting stance. Designed to be installed on a MIL-STD-1913 top rail.

TERMINATOR HANDSTOP WITH QD SLING SWIVEL SOCKET

P/N: 25460

Attaches to MIL-STD 1913 accessory rail with a single flat-head screw.

RIFLE PARTS MISCELLANEOUS

AMBI MAGAZINE RELEASE P/N: 20470-1

Left-side magazine release for AR pattern rifles. Oversized release button. Weight: 3 oz.

ENHANCED MAGAZINE RELEASE KIT P/N: 32394

Enlarged engagement area button is easily installed by replacing any standard, mil-spec magazine release button. Requires no modification to the host firearm.

MODULAR SELECTOR KIT SEMI-AUTO P/N: 32393

Kit includes multiple selector options to suit individual shooter preferences. There is the choice of any combination of short or long left or right side selectors, and a semi-flush indicator that provides a visual indication of the rifle's firing mode only. Installation is a simple, drop-in procedure. Compatible with both SR-15/AR-15 and SR-25 platforms.

SEMI-AUTO AMBI SAFETY SELECTOR P/N: 25776

Ambidextrous Safety Selector available with a beveled selector or standalone headpiece for optimal operator customization.

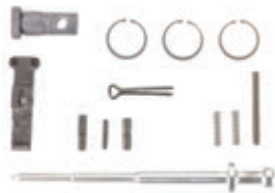

SEMI-AUTO 2 STAGE DROP-IN TRIGGER P/N: 25362

2-Stage, Match 4.5 lbs pull. Weight 2.4 oz
NSN: 1005-01-592-0663

SR-25 FIELD REPAIR KIT P/N: 98076-1
SR-25 E2 FIELD REPAIR KIT P/N: 31300

Firing Pin, Extractor, Bolt Rings, etc. for SR-25
Weight 1.2 oz
NSN: 1005-01-562-9451 (98076-1)

SR-15 FIELD REPAIR KIT P/N: 23339-1

Firing Pin, Extractor, Bolt Rings, etc. for SR-15
Weight 1.2 oz.

SR-15 E3 BOLT ASSEMBLY P/N: 20434

This is a Complete Bolt Assembly with all internal parts installed. The E3 Bolt is compatible with Knight's Armament E3 Barrel Extensions only.

SR-25 20 ROUND MAGAZINE P/N: 98036-1

Constructed of heat-treated steel, this magazine also features a positive locking clip on its base plate.
NSN: 1005-01-473-1403

SR-25 10 ROUND MAGAZINE P/N: 98037-1

Constructed of heat-treated steel, this magazine also features a positive locking clip on its base plate.
NSN: 1005-01-473-1405

AMBI QD SLING SWIVEL MOUNT

P/N: 24103

Receiver end plate integrates a QD sling swivel socket on either side for ambidextrous use. Free rotation

AMBI QD SLING SWIVEL MOUNT

P/N: 22051-1

Receiver end plate integrates a QD sling swivel socket on either side for ambidextrous use. Rotation limited.

NSN: 1005-01-601-5594
with QD swivel P/N: 24103-1

BALL LOCK SLING SWIVEL EYELET

P/N: 21317

KAC Ball Lock Sling Swivel Eyelet installs into QD sling swivel sockets and locks in place via a set screw.

PUSH BUTTON SLING SWIVEL

P/N: 97079

This KAC Heavy Duty Push Button Sling Swivel has a 1-1/4" loop. For use with QD sling swivel sockets.

BOREROD GUIDE P/N: 30640

SR-25 7.62 bore rod guide assembly. Polymer construction.

AR-15 PATTERN AMBI CHARGING HANDLE P/N: 31177
SR-25 PATTERN AMBI CHARGING HANDLE P/N: 30538

Intermediate sized latch pads are easily accessible and permit manipulation of the charging handle with a pinch-grip, index finger hook, or knife-hand from either side of the receiver, without over-protrusion posing a snag hazard. Innovative design will not cause the handle to lock-up even if one of the latches is damaged.

KAC PRECISION BIPOD

P/N: 31693

Highly adjustable bipod with swivel and track capability. Legs can be independently deployed to 6 positions: 0, 45, 67.5, 90, 135, and 180 degrees. With the legs at 90 degrees on a flat surface it provides 6.875 to 9.25 inches of height from the bottom rail in 5 easily selectable increments. Unobtrusive, easily manipulated lever enables full yaw release and lock. Tension screw adjusts yaw drag, and may be placed on either side of base or removed completely. Single push-button retention feature allows single-handed mounting and dismounting.

KAC PRECISION BASE FOR HARRIS BIPODS P/N: 31761

Provides the swivel and tracking features of the KAC Precision Bipod, but allows a retrofit of the Harris-S Series type bipod leg assembly.

QD BIPOD MOUNT SWIVEL P/N: 30526

Quick detach bipod mount that fits any MIL-STD-1913 rail. Allows limited swivel movement along the barrel's axis. Compatible with Harris S-Series Bipods only.

MWS BIPOD ADAPTER P/N: 98060

Designed for lower rail. Includes QD Stud 97030.
NSN: 1005-01-468-0350

SIGHTING ACCESSORIES

300M REAR FLIP SIGHT

P/N: 97082

300m Rear Flip Sight which mounts to any MIL-STD-1913 rail system. Removable peep insert to expose 5mm diameter "ghost ring" aperture. NSN: 1005-01-449-6306

600M REAR FLIP SIGHT

P/N: 98474

600m Rear Flip Sight which mounts to any MIL-STD-1913 rail system. NSN: 1005-01-449-6868

FOLDING M4 FRONT SIGHT

P/N: 99051

Originally designed for the US military's SOPMOD rifle program, the Knight's M4 Folding Front Sight is a low profile backup sighting solution that is designed to be attached to the top rail of a rifle's handguard. NSN: 1005-01-473-1410 Also available in Taupe. 99051-TAU

MICRO 300M FLIP UP REAR SIGHT

P/N: 25475

Micro 300m Rear Flip Sight which mounts to any MIL-STD-1913 rail system. Weight 1.5 oz, Length Folded 2.14"

MICRO 600M FLIP UP REAR SIGHT

P/N: 25650

Micro 600m Rear Flip Sight which mounts to any MIL-STD-1913 rail system. Weight 1.5 oz, Length Folded 2.14" NSN: 1005-01-581-5324

MICRO FLIP UP FRONT SIGHT

P/N: 25654

Micro Front Flip Sight which mounts to any MIL-STD-1913 rail system. Tool-less adjustments. NSN: 1005-01-598-4529

45° OFFSET CLAMP MOUNT REAR FOLDING SIGHT

P/N: 30878

The sights attach securely to the 12 o'clock rail position. Includes an elevation and windage adjustable 200-600 Meter Micro Rear Sight. Improved mounting base.

45° OFFSET CLAMP MOUNT FRONT FOLDING SIGHT

P/N: 31592

The sights attach securely to the 12 o'clock rail position. Includes an elevation adjustable Micro Front Sight. Improved mounting base.

45° OFFSET CLAMP MOUNT FOLDING SIGHT KIT

P/N: 31593

The sights attach securely to the 12 o'clock rail position and, once deployed, a quick roll of the rifle is all that's needed to acquire a usable sight picture. When not required the sights fold neatly to the right of the rifle's top rail. Includes an elevation adjustable 200-600 Meter Micro Rear Sight and finger adjustable Micro Front Sight assembly. Improved mounting base.

SIGHTING ACCESSORIES

ONE-PIECE SCOPE MOUNT

Scope Mounts for day optics. Fits any MIL-STD-1913 rail system. 1.5" ring height. Available in Black and Taupe.

Experience the difference and show off your Knight's pride with some Knight's Gear today! International Shipping available.

KnightVision™

Knight's Armament Company and its KnightVision component continues its unrelenting focus on research, design and production of weapon sights and rifles purpose-built for SOF applications. From its humble beginnings of developing a temporary solution in the early 1990's, KAC now has an entire family of inline Clip-on Universal Night Sights (UNS). These sights are designed to be positioned in front of a conventional day optic, while still providing the user with the same zero as when unaided. The KnightVision product line spans image intensification, uncooled thermal and fused passive IR and I² types of night vision augmentation devices. These innovative designs and engineering solutions have been rewarded with milestone US MIL contracts as their longer range version of USSOCOM's UNS, to include the AN/PVS-22, AN/PVS-26, AN/PVS-27, AN/PVS-29, AN/PVS-30 and AN/PAS-31. All of KAC's UNS products are manufactured at Knight's Headquarter facility, located in Titusville, Florida. This ensures the highest quality and reliability for on-time delivery of these state-of-the-art electro-optical night vision units.
