

KNIGHT'S
ARMAMENT

NEW PRODUCTS FOR 2013

URX IV

One of the initial designs which firmly established Knight's Armament in the firearms industry was the original RIS, or Rail Interface System. This free-floating, continuous top-rail system allowed a shooter to freely optimize their weapon with necessary accessories without compromising their weapon's integrity or accuracy. Knight's continued to improve this design with the introduction of the URX models which featured improved strength while reducing weight, integrated flip-up iron sights, and slick-sided models that further reduced weight and provided a more natural grip. The latest offering from KAC is the URX IV. The URX IV is a

continuous top-rail system that utilizes the Keymod mounting brackets developed by Vltor and Noveske. This rail system is built stronger and more stable than previous designs due to the absence of a removable bottom rail. The modular layout allows an end user to fully customize exactly where to place accessories without the use of specialized tools, small parts, or additional forces applied to the barrel.

The URX IV is currently available for 5.56 rifles in 8.5", 10", 13", and 14.5" lengths, and is equipped with Knight's unique IBN mounting configuration. The idea was to create a more modular, and thus more serviceable, rail system that still maintains

its strength and stiffness. The IBN system torques the rail onto the weapon and allows the rail to act as the barrel nut. This design was developed to increase stabilization and provide a simpler solution that requires less specialized tools to install and maintain. A full array of modular accessories, iron sights, and panel kits utilizing the Keymod mounting brackets have been developed specifically to accompany this rail system. With the introduction of the URX IV, Knight's Armament Co. demonstrates its continuing determination to intelligently design effective products.

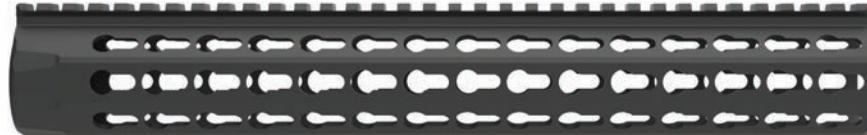

5.56 URX IV

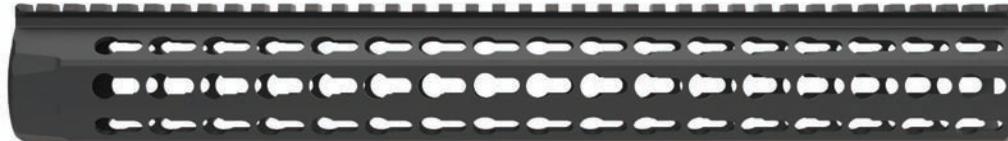

KIT P/N: 30738
Length 8.5"

KIT P/N: 30740
Length 10.0"

KIT P/N: 30736
Length 13.0"

KIT P/N: 30742
Length 14.5"

KITS INCLUDE SHIM SET AND WRENCH
