The M110K3 is the latest evolution of the precision lightweight 7.62mm NATO Carbine. The K3 is equally adept at putting rounds on target past 800 meters with a weight and form factor that is easy to carry and employ. Barrel and bolt life are extended beyond expectation, and in conjunction with the E2 gas system, significantly improves suppressed and unsuppressed functionality in adverse conditions. Ambidextrous user interface offers the left-handed user the ergonomic advantages inherent to AR-15 based controls, as well as giving right-handed users alternate methods of manipulation to increase efficiency of movement. The Drop-In 2-Stage Trigger serves double duty as an aid to long range precision marksmanship while enhancing surgical speed shooting at close range. Available with either a 7.62mm MAMS brake for exceptional recoil reduction, or a 5-Slot Flash Hider to minimize blast and ground disturbance, both supporting KAC QDC Signature Reduction Devices.
