The M110K5 is a suppressor optimized 7.62mm carbine. A precision 14.5 inch barrel combined with direct-thread semi-permanent suppressor options significantly reduces the length and weight normally associated with suppressed 7.62 platforms. An ambidextrous bolt release, selector, and magazine release offers the left-handed user the ergonomic advantages inherent to AR15 based controls, as well as giving right-handed users alternate methods of manipulation to increase efficiency of movement. The Drop-In 2-Stage Trigger serves double duty as an aid to long range precision marksmanship while enabling surgical speed shooting at close range.
