The M110A2 is the latest evolution of the precision 7.62mm NATO semi-automatic rifle. With a 20" match barrel, the A2 is purpose-built to provide precision fire on point targets past 1,000 meters. An ambidextrous bolt release, selector, and magazine release offer the left-handed user the ergonomic advantages inherent to AR15 based controls, as well as giving right-handed users alternate methods of manipulation to increase efficiency of movement. The Drop-In 2-Stage Trigger serves as an aid to long range precision marksmanship. The E2 bolt and gas system provides superior reliability in function whether suppressed or unsuppressed. A 7.62QDC Flash Suppressor reduces flash and ground disturbance, and supports KAC QDC Signature Reduction Devices.
