Winner of the U.S. Army award as one of the "Best 10 Inventions" of 2007, the M110 Semi-Automatic Sniper System (M110 SASS) is a precision 7.62mm NATO caliber, gas-operated rifle that is regarded for its battlefield performance. An evolution of the original MK 11; the rifle's accuracy, 20-round detachable magazine, ambidextrous controls, abundant MIL-STD 1913 rail mounting capabilities, and effective sound suppressor contribute to the system's combat success. Like the MK 11, the heart of the M110 system is a match-grade 20-inch free-floating 5R cut rifled barrel. Each of these 110 limited edition systems is individually marked and is to come as issued by the U.S. Army. A durable flat dark earth colored coating is applied over standard protective finishes.
