The UNS SR Clip-on Weapon Sight (WS) adds night capability to the existing rifle and day scope. The UNS SR is universal and fits most fielded rifles and day scope by attaching to the picatinny rail. Using the latest high performance GEN 3 intensifier tube in a proven design, where the refractive lens provides high performance light collection in a light weight design. The Knight Vision patented technology assures the accuracy of your range-tested day scope boresight will not be degraded. When the UNS SR is added in front, your existing optic, eye relief, and cheek weld are undisturbed. The UNS SR is designed for close quarter battle weapons such as the M4, M16, M14, SR25 and similarly configured battle rifles.
