KAC M-LOK PRODUCTS

SR-15 E3 MOD 2 M-LOK SERIES

The SR-15 E3 Mod 2 series' 5.56 mm NATO barrel is manufactured for military grade durability, and is free-floated inside a URX4 M-LOK handguard. An improved E3 round-lug bolt design both enhances function and increases bolt life far beyond the industry standard. The ambidextrous bolt release, selector lever, and magazine release offers left-handed users the ergonomic advantages inherent to AR15-based controls. The drop-in two-stage trigger serves double duty as an aid to precision marksmanship while enabling surgical speed shooting at close range. The 5.56 mm 3-Prong Flash Eliminator interferes with propellant gas combustion forward of the muzzle to significantly reduce flash signature, will not ring upon firing or when struck, and is compatible with the Knight's line of 5.56 mm QDC Signature Reduction Devices.

SR-25 E2 MOD 2 M-LOK SERIES

The SR-25 E2 series is the latest evolution of the dual role 7.62 mm NATO Carbine and Rifle. Each are equally adept at putting rounds on target past 800 meters or rapid multi-shot engagement at close range, with a barrel and bolt life to support the training regimen necessary to master these skills. An ambidextrous bolt release, selector, and magazine release offer the left-handed user the ergonomic advantages inherent to AR15 based controls, as well as giving right-handed users alternate methods of manipulation to increase efficiency of movement. The drop-in 2-stage trigger serves double duty as an aid to long range precision marksmanship while enabling surgical speed shooting at close range. A 7.62 QDC Flash Suppressor reduces flash and ground disturbance, and supports KAC QDC Signature Reduction Devices.

SR-30 M-LOK SERIES

The SR-30 E3 Mod 2 takes advantage of the .300 BLK, offering a 9.5" barrel that is as capable as an 11.5" 5.56 mm SBR, for a significantly more transportable and maneuverable firearm. The QDC compatible Flash Hider will mount any of the KAC 7.62 mm QDC suppressors. The SR-30 has 99% parts compatibility with the SR-15, requiring only a dedicated barrel and muzzle device. Seamlessly transition from subsonic ammunition to supersonic with nothing more than a change of the magazine.

KAC M-LOK ACCESSORIES SERIES

KAC M-LOK accessories are primarily designed to optimally interface with the URX4 series of handguards, but are fully compatible with other handguards that are built to the published technical data package. Construction material selected to match application, aluminum for weight reduction, steel for high strength and durability.

KAC M-LOK ACCESSORIES

**M-LOK SCOUT LIGHT MOUNT P/N: 31906**  
The KAC M-LOK mount for SureFire M300 and M600 Scout Lights is a lightweight, direct-attach mounting platform that replaces the OEM mount. The mount can be positioned to place the light close to the handguard at any position from 1:30 to 11:30 in relation to the top 12:00 rail. Aluminum construction.

**M-LOK 5-SLOT RAIL P/N: 31912**

This KAC M-LOK Accessory Rail is 3" in length and provides a 5 slot section of MIL-STD-1913 rail for the addition of tactical accessories. Designed specifically for the M-LOK URX 4 handguard, this rail section is also compatible with any other rifle handguard that has an M-LOK interface. Aluminum construction.

**M-LOK MICRO FRONT SIGHT P/N: 31896**

The KAC M-LOK Offset Flip Up Front Micro Sight, with finger-adjustable sight post, is designed specifically for attachment to the M-LOK URX 4 rail at the 45 degree position on the right or left hand side. Intended to be used in conjunction with KAC Rail Mounted Offset Folding Rear Sight (P/N 30878). This sight is compatible with other handguards that feature an M-LOK interface at 45 degrees from the top rail.

**M-LOK BARRIER STOP P/N: 31916**  
The KAC M-LOK Skeletonized Barrier Stop eliminates all unnecessary weight while still being robust enough for hard-use. The serrated front edge will bite into most surfaces at any angle of contact. Steel construction.

**M-LOK SLING MOUNT P/N: 32096**

The KAC M-LOK Sling Mount attaches quickly and securely to an M-LOK interface. The sling mount is compatible with push button sling swivels (sold separately).
